

**AN AFRICAN EXPERIENCE**  
**By Gerald Hinde & William Taylor**

Africa. The word conjures up a romantic picture of a continent of dramatic sunsets, magnificent wildlife and breath-taking landscapes. But this Africa is dwindling fast. An African Experience is a celebration of the untamed Africa as it exists in pockets of land under wise conservation management. Gerald Hinde's magnificent photographs convey the power and the beauty, the violence and the tenderness of African wildlife. The text draws the reader into experiencing Africa - from her smallest creatures to her greatest, from her tranquillity to her drama.

The book is a product of several months Gerald Hinde and William Taylor spent together in the MalaMala Reserve in South Africa researching Gerald's book Leopard. It offers the reader an opportunity to share in the excitement of the African bush - to enjoy the birdlife from under a giant sycamore fig tree on the banks of the Sand River or to watch with bated breath as a lion stalks its prey at a waterhole. An African Experience is an armchair safari through Africa as it used to be.
